In 2008, Regional Forest Owner Days were held in 7 different locations, namely Kempten, Grub/Bamberg, Lohr, Ansbach, Traunstein, Bad Kötzing and Röhrenbach.

The events consisted of three conceptionally independent parts. Except from scientific speeches concerning the topic forest management, in nearly all locations there was also a professional exhibition. The target group of the forest owners therefore was addressed in a multidimensional way: with knowledge, experiences and leisure offerings.

- Owners of very small forests could be interested in the regional forest owner days with personal invitations in cooperation with agricultural associations  
The success rate of the invitations to the event altogether was 15 %

The visitors of the event most prominently remembered the exhibition, these memories exceeded the memories of the stage play and the speeches

Concerning the impact of the forest owner days on the changes in taking action of the forest owners, a dissertation found that those forest owners who were already organized in forestry associations engaged a little more in their forests after the event than those who were not members of forestry associations.

They reacted faster after the event, followed contacts straight forward, took action faster in their forests and were generally more active.
