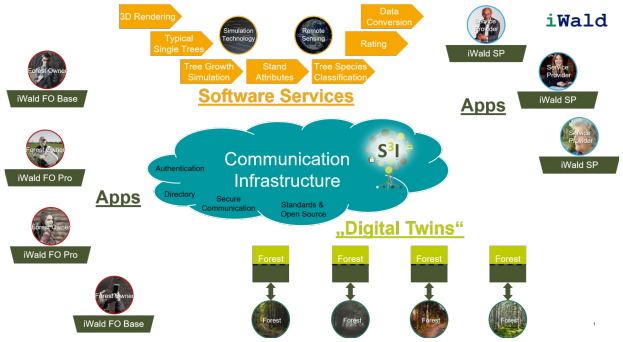
iWald | Forest growth simulation app



Comparison of silvicultural treatment concepts by simulating forest growth processes on the smartphone.

In the iWald project, a system is being developed enabling forest owners to obtain realistic and technically sound options for the sustainable management of their forests. The individual objectives of the forest owner (private, communal, state) are taken into account as well as the forestry risk minimization and the sustainable conversion of forests while safeguarding the economic, ecological and social forest functions. One of the main results of iWald will be the "iWald App", which can be used to simulate forest growth processes on a smartphone. This will be provided with different entry barriers, so that both the forest layman and the trained forester will find their access to iWald. The goals include activating forest owners, who can thus approach their forest on a playful level, or improving public acceptance of forestry interventions through the possibility of simple visualization of future consequences.

DETAILS

ORIGIN OF WOOD
--

TYPE OF WOOD
--

KIND OF WOOD CONCERNED
--

IMPACT ON ENVIRONMENT & BIODIVERSITY
Economic, ecological and social forest functions are integrated into the apps decision support system.

INCOME EFFECT
--

EXPLOITATION POTENTIAL
--

HUB
Central-West Hub

ECONOMIC IMPACT
--

SPECIFIC KNOWLEDGE NEEDED

MOBILIZATION POTENTIAL
High, activation of forest owners to initiate forestry interventions is encouraged by the game character of the app.

SUSTAINABILITY POTENTIAL - VALUE
Very Positive

EASE OF IMPLEMENTATION
The solution is not yet available on the market.

EASE OF IMPLEMENTATION - EVALUATION
Difficult

KEY PREREQUISITES

MORE DETAILS

CHALLENGE ADDRESSED

1.- Improve forest resilience and adaption to climate change

DOMAIN

Forest management, ecosystem, resilience

TYPE OF SOLUTION

Modelling, simulation, optimization

KEYWORDS

tree growth simulation

apps

private forest owners

service providers

DIGITAL SOLUTION

Yes

INNOVATION

Yes

COUNTRY OF ORIGIN

Germany

SCALE OF APPLICATION

National
