

SAFERS | Structured Approaches for Forest Fire Emergencies in Resilient Societies

SAFERS mission is to support societies becoming more resilient across the key phases of the forests fires emergency management cycle

The project is going to create an open and integrated platform featuring a forest fire Decision Support System. The platform will use information from different sources: earth observations from Copernicus and GEOSS, fire sensors in forests, topographic data, weather forecasts and even crowdsourced data from social media and other apps that can be used by citizens and first responders to provide situational in-field information.

MORE DETAILS

CHALLENGE ADDRESSED	DOMAIN	TYPE OF SOLUTION
1.- Improve forest resilience and adaption to climate change	Forest disturbances, risks	Traceability tools
KEYWORDS	DIGITAL SOLUTION	INNOVATION
Risk maps preparedness actions early detection	Yes	Yes
COUNTRY OF ORIGIN	SCALE OF APPLICATION	START AND END YEAR
Greece	Continental	2020 -
