Di-Gozd Digital Forest Inventory - Mobile app (Di-Gozd)

The mobile app complements the web application, allowing users to register a plot and make five different records. Tree count can be done automatically or manually using augmented reality. It helps estimate wood supply, track felled trees, and manage felling paths for better control.

For more information see FOREST4EU factsheet (click on)

MORE DETAILS

CHALLENGE ADDRESSED

3.- Activate private owners and cooperative forest management

DOMAIN

Inventory, monitoring

Innovation management, hubs, clusters

TYPE OF SOLUTION

Data platforms, data hubs

KEYWORDS

Biodiversity and nature managment

Supply chain

marketing and consumption

wood mobilization

DIGITAL SOLUTION

Yes

INNOVATION

Yes

COUNTRY OF ORIGIN

Slovenia

SCALE OF APPLICATION

National
