

# WoodsApp

WoodsApp is a map based forest information system, where user can utilize search engine that enables finding ideal forest compartment according to user-specific requirements. All Finnish-wide open forest stand data by Finnish Forest Centre is available in the system. Service works effortlessly on both mobile device or tablet, when you are searching suitable wood trade and silvicultural work units. WoodsApp brings significant benefits for timber buyers, forest service providers and forest owners associations. The service is an effective tool for searching timber trade or silviculture targets, the new customer acquisition of the forest service business and the purchase of forest property. You can see area, main tree species, development class, cutting potential, action proposals and

other information related to the forest stand. In addition to open forest stand data, useful background and theme maps are available. These maps help in finding important natural habitats or evaluate cutting potential.
