

Operational Program Competitiveness (POC)

Submitted by editor on Tue, 08/10/2019 - 12:47

The Operational Program Competitiveness (POC) supports investments to meet the needs and challenges of low levels of economic competitiveness, in particular with regard to (a) insufficient support for R & D and innovation (RDI), and (b) underdeveloped infrastructure and thus poorly developed services, thus positioning itself as a factor generating horizontal interventions in the economy and society, capable of enhancing growth and sustainability.
