

Public Tender Incentives for the development of wood products in the field of semi-finished products 2.0 2019-2020

Submitted by editor on Tue, 08/10/2019 - 14:26

The purpose of the public tender is to promote the introduction or increase of the production of semi-finished products in the field of wood processing and wood-based panels (wood share > 75%), as well as the complete use of wood products and filling the missing links in the forest-timber chain. The public tender is intended to: introducing or increasing the production of semi-finished products, -creating new jobs or increasing added value per employee in SMEs, and-promoting efficient use of energy and renewable energy sources, and implementing measures to improve the efficient use of resources that will contribute to Slovenia's transition to a circular economy.
