

Development and commercialization of wooden windows made of old, discarded wood, with special emphasis on wooden beams

The operation reduces the amount of discarded wood, which is otherwise deposited at landfills or burned. A new service life is given to old wood and its lifetime is extended, which directly influence the prolongation of CO₂ storage. The key sources of old wood will be defined, technological solutions for the use of such wood were developed and procedures for the production of windows were developed in cooperation with R&D institutions with an emphasis on the analysis of contaminated wood, physical properties of wood and the appropriate surface treatment of such products.

M Sora has developed a prototype of a timber window ReWin made of disposed timber. ReWin window is a unique example of a product that was developed by recycling the disposed timber that would otherwise end up at landfill, and represents a completely fresh idea and innovation in the field of builders' joinery.

DETALLES

ORIGEN DE LA MADERA

Trabajos de deconstrucción

TIPO DE MADERA

Madera reciclada o de desecho

POTENCIAL DE MOVILIZACIÓN

all well preserved construction wood

TIPO DE MADERA AFECTADA

Recycled wood, discarded wood

FACILIDAD DE APLICACIÓN

Funds and knowledge to develop windows from discarded wood

IMPACTO EN EL MEDIO AMBIENTE Y LA BIODIVERSIDAD

Reuse of old wood

FACILIDAD DE IMPLEMENTACIÓN - EVALUACIÓN

--

EFFECTO SOBRE LOS INGRESOS

Positive / new technology

PREREQUISITOS CLAVE

Funds and knowledge to develop window from discarded wood
