

## RESOFOP | Observation Network for the Private Forest economy

*RESOFOP (Observation Network for the Private Forest economy) is a national network that conducts surveys for forest owners, to get a refined knowledge on how they perceive their forest as well as the issue of climate change. The objective is also to identify what can be done to better adapt forest management to the changing climate. A national report is published each year.*

Private foresters had a lot of quantitative data thanks to the data accumulated by the National Forest Inventory for more than 20 years, as well as information on the structure of the private forest thanks to the Ministry of Agriculture's survey in 1999. But they did not take into account the behaviour of forest owners. In 2009, the network for observing the behaviour of forest owners was launched by the CNPF and Fransylva, with the financial support of France Bois Forêt. The objective is to collect new information on the behaviour of forest owners, particularly regarding the management of their forests according to their forest area and the region where they live. In the surveys, the same behavioural trends of forest owners appear: sentimental attachment to their wood, environmental responsibility, heritage to be valued and source of economic income.

The main outcomes include so far:

- Surveys carried out by telephone to owners of more than 4ha of wood cadastral land with a duration of 15min
- 2500 people interviewed throughout France during the surveys
- Other surveys for specific studies at a more regional level (risk perception, climate change,...).
- The results of the surveys make it possible to create new management tools for forest owners and new distribution media. They are also used to improve the advice of technicians in order to better take into account the expectations of forest owners and encourage them to mobilize their wood.

## DETALLES

---

ORIGEN DE LA MADERA

--

TIPO DE MADERA

--

TIPO DE MADERA AFECTADA

--

IMPACTO EN EL MEDIO AMBIENTE Y LA BIODIVERSIDAD

--

EFFECTO SOBRE LOS INGRESOS

## MÁS DETALLES

---

### RETO ABORDADO

3. Activar a los propietarios privados y la gestión forestal cooperativa

### DOMINIO

Gestión forestal, silvicultura, servicios ecosistémicos, resiliencia  
Investigación y desarrollo

### TIPO DE SOLUCIÓN

Herramientas de asesoramiento y servicios para propietarios forestales

### PALABRAS CLAVE

Climate change  
forest owners  
survey  
social science

### SOLUCIÓN DIGITAL

No

### INNOVACIÓN

Si

### PAÍS DE ORIGEN

Francia

### ESCALA DE APLICACIÓN

Nacional

### AÑO DE INICIO Y FIN

2009 -
