

LogBuch | Simple and efficient forest data collection

Digital solution for forestry data collection and networking of all actors in the timber process chain. Offline in the outdoor area, comfortable use thanks to voice recording and intuitive operation through a practice-oriented menu navigation in the mobile app and the web application.

LogBuch enables data aggregation in the forest, a simple evaluation of the data and further processing. The combination of voice recording and Bluetooth button enables hands-free precise location of trees with simultaneous recording of important information about the tree, such as safety instructions or planning working procedures. The expected cut volume can be determined, and assortments planned. Foresters and harvester operators both receive detailed information (cross-linking with third party systems is supported). Technology: An A 2-frequency GNSS-receiver is connected to a smartphone to estimate the current position. A bluetooth button is used for language analysis. All spoken information can be recorded, automatically transcribed and classified, and the actual position lodged. WLAN is used for data exchange between smartphone, webserver and other users. Data can be exported as a map or table in georeferenced or not referenced formats (xlsx, GeoJson, shp, GPX, map). Applications: Preparation of timber harvesting, establishment of a digital "inventory", area mapping (also planting) by connecting recorded corner points, mapping of skid trails by the line function (harvest control or certification basis), remote navigation via Google Maps. In addition, recording of habitat trees etc., support for hunting organization (high seats, driven hunt stands, stalking routes etc.) and traffic safety measures.

DETALLES

ORIGEN DE LA MADERA

Bosque

TIPO DE MADERA

Madera en rollo

TIPO DE MADERA AFECTADA

All types of wood

IMPACTO EN EL MEDIO AMBIENTE Y LA BIODIVERSIDAD

Decreased damages protect the forest soil as an important part of the forest ecosystem. Efficient planning also reduces fuel consumption.

EFFECTO SOBRE LOS INGRESOS

--

POTENCIAL DE EXPLOTACIÓN

--

HUB

--

IMPACTO ECONÓMICO

Good planning reduces working time and fuel consumption, resulting in cost reductions for timber harvesting operators.

POTENCIAL DE MOVILIZACIÓN

Better and more efficient planning of mechanized timber harvest supports wood mobilization through cost reduction.

POTENCIAL DE SOSTENIBILIDAD - VALOR

Positivo

FACILIDAD DE APLICACIÓN

The solution is available on the market.

FACILIDAD DE IMPLEMENTACIÓN - EVALUACIÓN

Very Easy

PREREQUISITOS CLAVE

--

TIPO DE EVENTO EN EL QUE SE HA PRESENTADO ESTA IFS

Visita de estudio (T2.3)

EFFECTO SOBRE EL EMPLEO

In light of aging workforces, digital solutions are expected to make forestry jobs more attractive to the next generation. The app helps to qualify staff.

COSTES DE IMPLEMENTACIÓN (EURO - €)

--

CONOCIMIENTOS ESPECÍFICOS NECESARIOS

Low / the manual is quite self-explanatory

MÁS DETALLES

RETO ABORDADO	DOMINIO	TIPO DE SOLUCIÓN
5. Mejorar el rendimiento económico y medioambiental de las cadenas de suministro forestal	Inventario, evaluación, seguimiento Gestión forestal, silvicultura, servicios ecosistémicos, resiliencia Aprovechamiento, infraestructura, logística	Maquinaria y equipos inteligentes
