# Forest consolidation in Bavaria – a stakeholder theoretical analysis

Forest consolidation is seen as a solution instrument for the fragmentation of small private forests in Bavaria. The focus of this project: perspectives for the involved authorities, professionals, communities and forest owners. Furthermore, the establishment and development processes as well as the evaluation of the forest consolidations from the perspective of the involved stakeholders was qualitatively analyzed in thee case studies

For forest consolidations the following actions are recommended:

If possible: increased implementation of the voluntary exchange of land

Use of successful examples in structural improvement activities as role models when new forest consolidations are initiated

Keep the duration of the procedure as short as possible

Intensive cooperation of the involved authorities

Planning and implementation of the forest consolidation adjusted to the situation and with special attention on key activities

Regarding the effect of forest consolidation on the mobilization of wood the following conclusions are drawn:

The effect of forest consolidation on the size of the property is only limited

Forest consolidation can help forest owners with strong forest owner motives to manage their forests how they want to and thereby increase the use of wood and intensify marketing activities

Relationships to the forestry communication network (becoming a member of forestry associations, getting advice from forest administration) are being

1

intensified or created

Forest administration and forestry associations need to get connected to forest owners and support them throughout the forest consolidation to create trust

DéTAILS		
ORIGINE DU BOIS	POTENTIEL DE MOBILISATION	
Forêt	1 – 2 m³/ha	
TYPE DE BOIS		
Grume	POTENTIEL DE DURABILITÉ - VALEUR	
TYPE DE BOIS CONCERNÉ	FACILITÉ D'IMPLÉMENTATION	
Stemwood	Difficult as it is a complex process including many forest owners but also	
	different authorities	
IMPACT SUR L'ENVIRONNEMENT ET LA BIODIVERSITÉ	FACILITÉ D'IMPLÉMENTATION - ÉVALUATION	
Medium effect on biodiversity and forest resilience enhancement		
EFFET SUR LE REVENU	PRÉREQUIS CLÉS	
more efficient working processes and higher harvesting amounts	Forest owner data from the authorities	
POTENTIEL D'EXPLOITATION	TYPE D'éVéNEMENT Où CETTE ICPE A éTé PRÉSENTÉE	
HUB	EFFET SUR L'EMPLOI	
	Better qualified staff through verification and discussion possibilities	
IMPACT éCONOMIQUE	COûTS D'IMPLéMENTATION (EURO - €)	
It will contribute to more efficient working processes	<del></del>	

CONNAISSANCES SPÉCIFIQUES REQUISES

There is need for enhanced organizational but also administrative processes
