

## Knowledge transfer for climate sensitive forest management

Continuous education efforts, awareness rising, workshops for practitioners and interested people to convince them for an actively managed forest especially focused on the climate change items.

First of all small-scale private forest owners (about 70.000 in A with less than 5 ha) and new forest owners (not directly connected to farms and farmland) shall be informed about an active sustainable forest management (harvest).

On the other side consumers will be encouraged to use wood and wood products as much as possible

Small-scale private forest owners may be re-interested in forest management when they are properly informed about the challenges of climate change and adaptation.

Dissemination of knowledge has to address a broad public at its needs on a general level to raise awareness significantly

Top down initiatives always have to be supplemented with bottom up approaches to raise their effectiveness

National campaign 20126 - 2021

"The use of wood is good for the climate – we make forests climate fit"

Central messages – climate change creates new realities

Climate Change is a fact – and it affects forests

#2

Paris Agreement enforces the signatories to move from talking to doing

#3

In Austria, temperatures increased by an average of 1,8 Deg C in the 20th century, with increases being recorded at all altitudes

#4

A crucial factor to make forests fit for climate change is adaptive forest management

#5

The forest- and wood-based sector plays a key role in climate change

#6

The efficient use of wood as a renewable raw material and energy carrier includes a considerable reduction in anthropogenic carbon

#7

Mitigation: the harvesting potential should be fully utilized considering general sustainable conditions to mitigate climate change

#8

Adaption: it needs active sustainable forest management practices in order to create stable and vital forest stands which withstand climate change induced disturbances, e.g. storms, diseases and droughts

## DETALJI

---

### PODRIJETLO DRVA

Šuma

### VRSTA DRVA

Deblo

### POTENCIJAL ZA POVEĆANJE UPORABE DRVA

Espec. in forests < 5 ha (70.000 owners)

### POTENCIJAL ODRŽIVOSTI - VRIJEDNOST

--

### ODGOVARAJUĆA VRSTA DRVA

Stemwood from forests

### JEDNOSTAVNOST PROVEDBE

Medium

### UTJECAJ NA OKOLIŠ I BIORAZNOLIKOST

Positive, greater variety of species stands get more stable, greater resilience against pests

### JEDNOSTAVNOST PROVEDBE - EVALUACIJA

--

### UČINAK NA PRIHOD

Continuous used small forests contribute and secures broader base of income

### KLJUČNI PREDUVJETI

Get the remote owners of the very small forest estates informed about wood harvest possibilities by pro's

### POTENCIJAL ISKORISTIVOSTI

--

### VRSTA DOGAĐAJA NA KOJEM JE PRIKAZAN OVAJ BPI

--

### SREDIŠTE

--

### UČINAK NA ZAPOSŁJIVOST

Forest coop's rise the number of pro's in rural areas

### GOSPODARSKI UČINAK

Mobilisation of small forests rises the agroforest net return

### TROŠKOVI PROVEDBE (EURO - €)

--

### POTREBNA POSEBNA ZNANJA

Forest harvesting enterprises need workers with experience of felling, logging and planting

## VIŠE DETALJA

---

### IZAZOV

--

### DOMENA

Vlasništvo, suradnja

Upravljanje inovacijama, digitalni centri, klasteri,  
eksploatacija (transverzalno)
