Forest consolidation in Bavaria – a stakeholder theoretical analysis

Forest consolidation is seen as a solution instrument for the fragmentation of small private forests in Bavaria. The focus of this project: perspectives for the involved authorities, professionals, communities and forest owners. Furthermore, the establishment and development processes as well as the evaluation of the forest consolidations from the perspective of the involved stakeholders was qualitatively analyzed in thee case studies

For forest consolidations the following actions are recommended:

If possible: increased implementation of the voluntary exchange of land

Use of successful examples in structural improvement activities as role models when new forest consolidations are initiated

Keep the duration of the procedure as short as possible

Intensive cooperation of the involved authorities

Planning and implementation of the forest consolidation adjusted to the situation and with special attention on key activities

Regarding the effect of forest consolidation on the mobilization of wood the following conclusions are drawn:

The effect of forest consolidation on the size of the property is only limited

Forest consolidation can help forest owners with strong forest owner motives to manage their forests how they want to and thereby increase the use of wood and intensify marketing activities

Relationships to the forestry communication network (becoming a member of forestry associations, getting advice from forest administration) are being

intensified or created

Forest administration and forestry associations need to get connected to forest owners and support them throughout the forest consolidation to create trust

PODRIJETLO DRVA	POTENCIJAL ZA POVEĆANJE UPORABE DRVA
Šuma	1 – 2 m³/ha
VRSTA DRVA	
Deblo	POTENCIJAL ODRŽIVOSTI - VRIJEDNOST
ODGOVARAJUĆA VRSTA DRVA	JEDNOSTAVNOST PROVEDBE
Stemwood	Difficult as it is a complex process including many forest owners but also
	different authorities
UTJECAJ NA OKOLIŠ I BIORAZNOLIKOST	JEDNOSTAVNOST PROVEDBE - EVALUACIJA
Medium effect on biodiversity and forest resilience enhancement	
	KLJUČNI PREDUVJETI
UČINAK NA PRIHOD	REJOCNI PREDOVJETI
UCINAK NA PRIHOD more efficient working processes and higher harvesting amounts	Forest owner data from the authorities
more efficient working processes and higher harvesting amounts	Forest owner data from the authorities
more efficient working processes and higher harvesting amounts	Forest owner data from the authorities
more efficient working processes and higher harvesting amounts	Forest owner data from the authorities
more efficient working processes and higher harvesting amounts POTENCIJAL ISKORISTIVOSTI	Forest owner data from the authorities VRSTA DOGAđAJA NA KOJEM JE PRIKAZAN OVAJ BPI
more efficient working processes and higher harvesting amounts POTENCIJAL ISKORISTIVOSTI	Forest owner data from the authorities VRSTA DOGAđAJA NA KOJEM JE PRIKAZAN OVAJ BPI UČINAK NA ZAPOŠLJIVOST
more efficient working processes and higher harvesting amounts POTENCIJAL ISKORISTIVOSTI	Forest owner data from the authorities VRSTA DOGAđAJA NA KOJEM JE PRIKAZAN OVAJ BPI UČINAK NA ZAPOŠLJIVOST
more efficient working processes and higher harvesting amounts POTENCIJAL ISKORISTIVOSTI SREDIŠTE	Forest owner data from the authorities VRSTA DOGAđAJA NA KOJEM JE PRIKAZAN OVAJ BPI UČINAK NA ZAPOŠLJIVOST Better qualified staff through verification and discussion possibilities

POTREBNA POSEBNA ZNANJA

There is need for enhanced organizational but also administrative processes
