

# BioRES | Biomass trading centres calculation tool

## *Calculation tool for the establishment and operation of biomass trading centers*

Biomass Logistic and Trade Centres (BLTCs) are local or regional centres with optimised logistics and trading organization, where different woody bioenergy products (or heat) are marketed at standardised quality focusing on the domestic market uptake. It's an innovative business model competitively operating as an intermediary to organise local woody bioenergy value chains between local biomass suppliers and customers of different scale from private households up to deliveries to heat and power plants. BioRES supported setting-up such BLTCs in Bulgaria, Croatia and Serbia.

Starting point are web-based marketing and sales platform with limited physical infrastructure. This can be successively extended into a BLTC with its own production, storage and logistics facilities when the local market reaches critical volumes allowing for the amortization of investments. In Slovenia, Austria, Germany and Finland BLTCs of different shape with own production, storage and logistic facilities are competitively operating. BioRES aims to setting up at least 6 – 8 new BLTCs in distributed over at least 2 of the 3 countries in Croatia, Serbia and Bulgaria during the project.

## MER INFORMASJON

---

### UTFORDRING ADRESSERT

5. Forbedre den økonomiske og miljømessige ytelsen i skogbrukets forsynings kjede

### NØKKELORD

biomass; logistics

### OPPRINELSESLAND

Østerrike

### DOMENE

Avvirkning, infrastruktur, logistikk  
Industri for skogbasert bioenergi

### DIGITAL LØSNING

Nei

### POTENSIALE

Regional/deler av landet

### TYPE LØSNING

Samarbeidsplattform, logistikk knutepunkt

### INNOVASJON

Ja

### START OG SLUTT ÅR

2015 - 2018

## KONTAKT INFORMASJON
