

SAXMEL-- Local-scope forest management support system

SAXMEL intends to become a novel highly systematized and protocol-based approach aimed as a solution to contribute improving current forest management practices acting at local scope. SAXMEL consists of a catalogue of services composed of identified key processes considered essential to solve major problems affecting forest resource development. Also it includes some inner processes and procedures aimed to steer the system itself functioning such as resource management, communication, financing & founding, ...SAXMEL has been conceptualized based on some key mainstays: participatory approach, transparency, self-sufficiency, selfgovernance, territorial persistency, technical criteria-based, local scope.

- 1- Providing solutions to and gaining interest from public administration is a failed task as their functioning are far from efficient, transparent and sound
- 2- There is a great need from private stakeholders towards integral solutions to forest resource problems, this has been checked on several territories
- 3- SAXMEL's concept approach is valid preliminarily, although implementation needs to be broadly validated.

Currently the solution is under development, being piloted in the municipality of Gondomar (Pontevedra, Galicia) thanks to broad support from 80% of community-scope forest landowners. There is an approved regional operational group as well as a national operational group still both pending from funding.

DETALJER

OPPRINNELSE FOR TRE

--

TYPE TRE

--

TYPE TRE INVOLVERT

All

PÅVIRKNING PÅ MILJØ OG BIOLOGISK MANGFOLD

Very positive

INNTÉKTSEFFEKT

Estimated average: 200k€/yr/municipality at production stage

UTNYTTELSESPOTENSIAL

--

HUB

--

ØKONOMISK PÅVIRKNING

At Galicia scope, with 313 municipalities with average of 65-70% of forest land: target market : 3M€, target wealth mobilization 30M€/yr

SPESIFIKKE KUNNSKAPSBEHOV

MOBILISERINGSPOTENSIAL

10:1, (SAXMEL can mobilize 10 times additional figures at production stage)

BÆREKRAFTPOTENSIAL - VERDI

--

ENKEL IMPLEMENTERING

Difficult Collaborative practices are highly needed, which is not in the forest sector habits, this makes approach difficult to implement.

ENKEL IMPLEMENTERING - EVALUERING

--

VIKTIGE FORUTSETNINGER

Ownership structure. Stakeholders' status.

TYPE BEGIVENHET DER DENNE BPI HAR BLITT OMTALT

--

EFFEKT PÅ ARBEIDSPLASSE

Estimated average: 10 direct jobs/municipality /year

KOSTNADER MED IMPLEMENTERING (EURO - €)

--

1- Collaborative skills 2- Participatory tools 3- IT
