

Aid for the evaluation of Spanish terrestrial biodiversity. 2019

Submetido por editor em Sex, 20/09/2019 - 10:58

Implementation of projects that provide relevant data to assess the state of conservation of terrestrial elements of Spanish natural heritage, especially those that fall under specific conservation measures or of community interest. Relevant data on: i. The state of the areas protected by international instruments in compliance with the provisions of the European Directives and the corresponding international Conventions and agreements, and of Biosphere Reserves designated by UNESCO (Wetlands of International Importance, natural sites on the World Heritage List, Geoparks, Biogenetic Reserves of the Council of Europe, etc.). ii. The status of the species included in the list of wild species under special protection and the Spanish catalogue of endangered species, with special attention to the species in a referenced critical situation.
