MOFOB

The project consists of creating a shared tool in the form of an online platform to facilitate the evaluation of supply plans and to limit conflicts of use from forest resources.

The tool integrates data related to the availability of the wood resource, taking into account harvests and past forest removals as well as the potential for additional wood energy and industrial wood harvesting. It thus provides an up-to-date view of the wood energy and wood industry resource at the departmental level.

In addition, the consumption of recent and planned biomass boiler is indicated in order to calculate the supply and demand balance for a territory.

Currently, the platform is tested and revised after feedback from users and experts associated with the project. It appears necessary to consolidate data on resource availability, biomass boiler consumption and other wood uses.

Data related to wood resources come from IGN inventories (National Institute for Geographic and Forestry Information), AGRESTE surveys (service of the Ministry of Agriculture and Food) and ADEME studies (Environment and Energy Management Agency).

With a single tool, it is possible to:

- monitor harvests and wood consumption at the departmental level,
- estimate the additional resource,
- use indicators of the capacity to mobilize the resource.

1

The platform provides summary tables on resource availability and a boiler consumption database. It allows users to monitor the evolution over time of biomass boiler and wood resource consumption.

It also provides related indicators to estimate the strain on the resource. Users can simulate the impact of a new boiler installation on their territory.

This type of tool appears necessary and useful both for public bodies for the implementation of their policy, and for industrialists who wish to develop their activities.

DETALII	
SURSA DE LEMN	POTENțIALUL DE MOBILIZARE
	NA
TIPUL DE LEMN	
Lemn masiv	POTENțIAL DE SUSTENABILITATE - VALOARE
	
TIPUL DE LEMN ÎN CAUZĂ	FACILITATEA DE IMPLEMENTARE
Stemwood, woody biomass, waste	Difficult
IMPACTUL ASUPRA MEDIULUI ȘI BIODIVERSITĂțII	FACILITATEA DE IMPLEMENTARE - EVALUARE
Little direct impact	
EFECT ASUPRA VENITURILOR	CONDIțII CHEIE PREALABILE
NA	To have data on the different types of wood resources:stemwood, waste,
	related,
POTENțIAL DE EXPLOATARE	TIPUL DE EVENIMENT LA CARE A FOST PREZENTAT ACEST IPB
HUB	EFECT ASUPRA LOCURILOR DE MUNCĂ
	Facilitates work to estimate boiler supply plans
IMPACT ECONOMIC	COSTURI PENTRU IMPLEMENTARE (EURO - €)
Platform used by public institutions or industries for decision support	
CUNOșTINțE SPECIFICE NECESARE	

Boiler consumption, resource availability data at a departmental level
