

Forest Information Standard

Forest information is standardized so that actors engaged in the forest sector could develop and use harmonized information systems. Although basic concepts and measurement units have been defined for decades, almost every actor has implemented them differently in their information systems. Converting and transferring information is difficult or almost impossible between systems. Forest information standards facilitate the use of open materials and data transfer between actors. This improves operational efficiency and international competitiveness of forest sector.

The development of information exchange interfaces is not finished. The goal is a situation where all forest industry systems would read, write and send via a forest information standard.

Standard defines the structure, data types and codes used in different schemes. Forest information standards are based on XML-format (geometry: GML). Data to be exchanged with standards is: special feature data, forest compartment data, forest use declaration, timber trade, harvesting and operations. The projects outcome is: documentation, schemas, guidelines, practises. The outcome will be written XML files which are transferred between different systems. XML is used as it is international data standard, a method to structure electronic documents. XML-documents (=files) are readable and alloes to import data into all systems capable of reading such documents. The structure of XML-documents can be validated automatically so it follows its definitions (=schema).

DETALII

SURSA DE LEMN

Pădure

TIPUL DE LEMN

Lemn masiv

POTENȚIALUL DE MOBILIZARE

1 m³/ha

POTENȚIAL DE SUSTENABILITATE - VALOARE

--

TIPUL DE LEMN ÎN CAUZĂ

Stemwood

FACILITATEA DE IMPLEMENTARE

Medium

IMPACTUL ASUPRA MEDIULUI ȘI BIODIVERSITĂȚII

Positive

FACILITATEA DE IMPLEMENTARE - EVALUARE

--

EFFECT ASUPRA VENITURILOR

Positive

CONDIȚII CHEIE PRELABILE

Involve all relevant stakeholders in the development

POTENȚIAL DE EXPLOATARE

--

TIPUL DE EVENIMENT LA CARE A FOST PREZENTAT ACEST IPB

--

HUB

Hub-ul de Nord

EFFECT ASUPRA LOCURILOR DE MUNCĂ

Better qualified staff / better operations and transport

IMPACT ECONOMIC

High with fully digitalization

COSTURI PENTRU IMPLEMENTARE (EURO - €)

--

CUNOȘȚINȚE SPECIFICE NECESARE

High, complex approach- Introduction to XML schemes
