### [ROSEWOOD4.0 Best Practices & Innovation: Wood Terminals from Finland](#)

ROSEWOOD4.0 Northern Hub features in this video Finland's "Wood Terminals" as a best practice from the country's timber-producing provinces, such as Lapland.

One of the challenges of wood mobilisation is the small-scale timber units that are located at a great distance from the nearest roads. The answer to this challenge, as in Finland, is to build bigger wood terminals where wood from multiple small-scale units would be gathered from the same area for intermediate storage.
