

Description of INNOVATION

Innovation	
Title	FORETDATA
Picture	Digitalization, data security, networks
Domain	Stemwood
Source of wood	Nouvelle-Aquitaine
Location	loggers, companies in the sector, local elected officials
Implementers	Running
Actual status	FORETDATA is an operational collaborative platform for all stakeholders in the forest-wood-paper sector. It aims to improve knowledge of their activities by exchanging data. The platform makes it possible to obtain summaries at the level of the territory on the forest activity and to follow for each company their activities in relation to their data entry.
Approach	The mayors of municipalities can monitor the number of logging sites and their execution periods thanks to the platform.
Main results	Each forestry contractor fills in data related to the logging site (type of work, surface area, date of intervention, estimated volume, characteristics of the land) in order to fill out the online site opening declaration forms and safety data sheets. These are then sent directly to the services concerned (municipalities, DDT).
Lessons learned	The sites are all mapped under GIS and the data referenced.
Contact information	The users of the platform benefit:
Link to website	- an online mapping tool that allows you to consult the cartographic bottoms and regulatory zoning
Code	IN_FR_02

Innovation assessment

Region	Nouvelle-Aquitaine
Time scale	Since 2014
Mobilization Potential	Facilitates overall mobilization by reducing the administrative workload of contractors and improving the acceptability of forestry activity to elected officials, communities, etc.
Kind of wood concerned	Stemwood
Sustainability Potential	Very positive: a long-term project that develops step by step.
Impact on environment	No direct impact

& biodiversity	
Ease of implementation	Easy: mapping tool + database to create
Economic impact	Reduces contractors' administrative time, freeing up time for prospecting
Job effect	NA
Income effect	NA
Specific knowledge needed	NA
Costs of implementation	150 000 €
Technical readiness level	Applicable
Key information for adoption	Tool for the entire forest-wood sector, facilitates exchanges and administrative procedures
