

Forest Management Contracts

ROSEWOOD
4.0 Sustainable Wood
for Europe

Many forests that could generate income are not really managed and forest-owners don't take care of them. The causes are very often the low profitability of wood exploitation and the complexity of its management. Forest owners are not usually specialists and are not engaged in forestry activities. This leads to no incomes and to an increased risk of fires and pests. Faced with this situation, Agresta proposes specific contracts to forest-owners, making it possible a professional sustainable management allowing revenues, forest planning, wood mobilization, and infrastructure and silvicultural operations.

Forest management is not enough to get many forests out of abandonment. It is important to be in contact with main stakeholders and the reality of the markets, something that a forestry company can assure.

It is necessary to work with professionalism, entrepreneurial vision and long-term commitment, in a collaborative relationship and win-win with the owner. The specialization in turnkey forest management by a company allows improving and making profitable the management since it increases the innovation capacity, including the technological one (management software, forest inventories with remote sensing...)

Taking into account environmental and heritage issues of sustainable management

PODROBNOSTI

Pôvod dreva

Les

Druh dreva

Kmeňové drevo

Mobilizačný potenciál

25.000 m³ per year

Uvažovaný druh dreva

Stemwood

Uľahčenie implementácie

Medium
