

PONSSE firefighting equipment for forwarders

PONSSE is introducing firefighting equipment to be installed in the load spaces of forwarders for extinguishing wildfires.

Forest machine is the most natural and effective way to access a forest fire area. Operations in difficult terrain come as second nature to them, and they have more than enough capacity in their hydraulic system for demanding conditions. The firefighting equipment is delivered to the fire location as a single package – and after it has been connected to forest machine hydraulics, the equipment is ready to operate.

The 10 m³ water tank of the firefighting equipment can be filled with its own pump from a natural water source or the tank of a fire truck. The water cannon has a range of 47 metres and a turning radius of 360 degrees. It takes 5 to 10 minutes to refill the tank. The filling hose is guided by the forwarder's boom and the strainer on the tank roof takes out the biggest debris. The water cannon is controlled with the remote control. The system draws its power from the hydraulics of the forwarder.

VIAC INFORMÁCIÍ

RIEŠENÁ VÝZVA

1. Zlepšenie odolnosti lesov a adaptácie na zmenu klímy

DOMAIN

Disturbancie/kalamity, riziká, odpoveď na katastrofu

TYP RIEŠENIA

Inteligentné stroje, zariadenia

Kľúčové SLOVÁ

forest machine

forwarder

firefighting

DIGITALNE RIEŠENIE

Nie

INOVÁCIE

Áno

KRAJINA PôVODU

Fínsko

ROZSAH APLIKÁCIE

Cezhraničný/multilaterálny
