

## CFHarvest (WoodForce) | Forestry software for loggers, forest contractors and forest companies

CFharvest (WoodForce) is planning- and steering system for harvesting and silviculture to optimize and strengthen the supply chains of forestry. Forestry company delivers all the contracts the WoodForce-system according to the need of raw material. The contractor selects the contracts and the locations he will perform. Forest companies have decreased harvesting and average costs in Silviculture or Regeneration job types. There has been increasing productivity in the supply chain of stem wood and energy wood. Also increasing productivity in field operations in Forestry like Silviculture Harvesting Forest Services. Contractors have the ability to manage their own forestry services and receive the full benefit of all resources. Possibility to operate for multiple forest companies is important. In addition, there is less manual reporting and worksite navigation is easier. CFharvest supports a changing trend where progressive companies now contract for several forest companies and do the planning with one system. Since the contractor understands local conditions best, forest harvesting operations become more efficient: the contractor has direct control over work plans and scheduling his own fleet of harvesters and trucks.

## PODROBNOSTI

---

IZVOR LESA	POTENCIJAL ZA MOBILIZACIJO
Gozd	Not possible to assess
TIP LESA	TRAJNOST - VREDNOST
Okrogli les	--
VRSTA OBRAVNANEGA LESA	ENOSTAVNOST IZVEDBE
Stemwood, Above and below ground woody biomass	Easy
VPLIV NA OKOLJE IN BIODIVERZITETO	ENOSTAVNOST IZVEDBE - OCENJEVANJE
Medium	--
VPLIV NA PRIHODKE	KLJUČNI PREDPOGOJI
Positive	Good communication is needed with all stakeholders
POTENCIJAL IZKORIŠČANJA	VRSTA DOGODKA, NA KATEREM JE BIL PREDSTAVLJEN TA BPI
--	--
VOZLIŠČE	VPLIV NA DELOVNA MESTA
Severno vozlišče	Positive
GOSPODARSKI VPLIV	STROŠKI IZVEDBE (EURO - €)
Positive/ Less costs of harvesting	--
POTREBNO SPECIFIČNO ZNANJE	
Digital expertise combined to forestry expertise
