## About the web application

The Invazivke web application is part of the public electronic information system for collecting data on invasive alien species (ITV), which includes a desktop, web and mobile application and connects several existing information systems that already collect data on ITV in Slovenia.

## Invitation to participate

Anyone can take part in reporting the findings of alien species. You are warmly invited to participate. The first step is [user registration](#). This is followed by [logging in to the web application](#).

## Mobile application

The free Invasive apps in [the Play Store](#) are available for portable devices running Android.

### Seznam

sajato odmiranje skorje,  
pooglenitev hrastov  
javorov rak  
fitofore  
borov smolasti rak

## Selected species

### kudzu

*Pueraria montana* var. *lobata*

*The Invazivke web application is part of the public electronic information system for collecting data on invasive alien species in Slovenia.*

The mobile application Invazivke is free to use and is intended for the general public. To use the application, one must register using a valid email address. It is designed for field data collection with a smart device that includes a GPS sensor and a digital camera. This allows user to automatically capture the location (exact X and Y coordinates) and photo with the device, which greatly facilitates and speeds up data entry. The user manually selects of the species from the drop-down menu. The application also includes a manual with a description of invasive alien species (IAS), including pictorial material to facilitate the identification of the found organism. The mobile application Invazivke enables the recording of IAS finds without an internet connection. The exchange of data with the central server takes place at the request of the user when connected to the Internet and is carried out according to the synchronization process.
